PowerBI Project Lifecycle

4 Main Stage

1 : Data Ingestion & Preparation

- **Connectivity & Integration** : Connection data from CSV Files.
- **Data Cleansing & Processing** : Using *Power Query* to ensure data is ready for analysis.

2 : Data Modelling

- **Data Relationships** : Building the Data Model between tables.
- **Time Intelligence** : Creating a dedicated Date Table to support precise time-based analysis.

3 : DAX Measure & Logic

- **Advanced Computation** : Using DAX functions (Calculate, Date, Text, Filter) for business calculations.
- **Performance Analysis** : Implementing YTD (Year-to-Date) and QTD (Quarter-to-Date) formulas for trend tracking.

4 : Visualization & Dashboarding

- **UI/UX Design** : Creating charts, *Card Visuals*, and custom formatting.
- **Interactivity** : Adding *Custom Sorting*, *Conditional Formatting* for quick insights, and page navigation for an interactive dashboard experience.
